Scotland as a part of the UK/ Шотландия как часть Соединенного Королевства.

This report has the aim to examine more than 300-year history of the UK-Edinburgh relations. Not only is Scotland the embodiment of freedom, determination and recalcitrance, it is also the second largest part of the UK, the oldest state in the British Isles, the largest oil reserve in the European Union. So the question that arises nowadays is whether Scotland should remain a part of the UK or become an independent country with its own policy and government.

**The Pre-Raphaelite art movement in England: the connection between art and philosophy/
Английское движение прерафаэлитов: связь искусства и философии**

The article is devoted to the analysis of the Pre-Raphaelite art movement in the context of the anti-Victorian reaction in the British culture of the second half of the 19th century. The genesis of the movement, the specific phases of its development and its influence on European art culture of the end of the 19th – early 20th centuries are contemplated upon in the article. The special attention is paid to the analysis of the counter-culture philosophy component of the Pre-Raphaelite movement and its reflection in utopian theoretical work ‘News from Nowhere’ of William Morris. He is recognised as one of the most significant cultural figures of Victorian Britain: though best known in his lifetime as a poet and social activist, he posthumously became better known for his designs.

The Troubles/ Англо-ирландский конфликт

Vsevolod Ovchinnikov visited Northern Ireland in the 1970s and described his impressions in the article “Much-suffering Island”. The author narrated about the historical reasons of Anglo-Irish animosity, the development of the conflict during the last century and concluded that life in Belfast went on “on the verge of death”. The aim of my research is to analyze how the situation has changed after the signing of The Good Friday Agreement in 1998 and to compare political environment in the region in the late 20th century and nowadays.

Faculty of Political Science, 2nd year students/ Факультет политологии, студенты, 2 курс

Забывшие уроки истории: У. Черчилль и послевоенный мир/ Forgotten the lessons of history: Winston Churchill and the postwar world.

This work represents a brief analysis of the activities of the former British Prime Minister, Sir Winston Churchill on the basis of the Fulton speech and events in Coventry. It gives a brief description of the "Cold war" as a historical fact, and shows the relevance of some of the quotes from his speech in the modern world. Much attention is paid to the relations of the Anglo-Saxon world and the Soviet Union (Russia).

5. Katkov Ilya/ Катков Илья

Faculty of Political Science, 1st year student/ Факультет политологии, студент, 1 курс

To the question of the history of England-Scotland relations/ Проблема исторических взаимоотношений Англии и Шотландии

The relations between England and Scotland has been one of the most difficult political issues of the contemporary United Kingdom. From the ancient times, Scottish people were fighting the British state for their freedom and independence. During almost 500 years of continuous clashes Scottish independence was recognized several times. In 1603 after the death of Elizabeth I England and Scotland were united under personal union of the Scottish king James VI, but each party retained its own parliament and government. In 1997 at the initiative of the labour government of Tony Blair, a referendum was held on the question of the national Parliament of Scotland. Although, the question of the independence of this part of the United Kingdom still remains unsettled.

Faculty of Political Science, 2nd year student/ Факультет политологии, студентка, 2 курс

Contribution of Great Britain to the musical culture of twentieth century/ Вклад Великобритании в музыкальную культуру XX века.

It is clear that the culture of Great Britain is rich enough to influence the global culture. The musical culture is not an exception. English musicians created masterpieces for centuries and their compositions can excite listeners until nowadays. The twentieth century had a boom-effect: the UK gave us "The Beatles", "Rolling Stones", "Pink Floyd", etc. This research is to understand the character of the contribution of these musicians to the global culture.

Brexit and rise of right-wing movements as tools of EU collapse/ Брексит и рост влияния правых сил как инструменты распада Европейского Союза

This presentation will be devoted to the analysis of Brexit and right-wing movements as factors of possible collapse of the EU. It will start with the observation of views of British politicians about the process of Brexit and the draft of the future relations with the EU. It will also make an emphasis on the programs of right-wing movements in France, Germany and Netherlands. Finally, it will touch the question of the most possible scenario of the three ones, which will be expected in 20 years.

Modern separatist movements in the United Kingdom / Современные сепаратистские движения в Великобритании

Nowadays one of the most serious threats, which Europe faces, is growing separatist movement in its member states, particularly in the United Kingdom. The Scottish independence referendum that took place on September 18, 2014 ended with the defeat of the separatists. However, prior to this fall separatism had grown strong again in different regions of the United Kingdom, and now, after the "Brexit", Britain faces a new wave of separatism.

Faculty of Political Science, 1st year student/ Факультет политологии, студент, 1 курс

The Ulster question through a political prism/ Ольстерский вопрос через призму политики

Every state has to be powerful in order to defend its interests in the sphere of international relations. Both internal and external events do influence any state's stability. In this respect, the United Kingdom is no exception. The Ulster question for the United Kingdom is a typical example of such inner impact. Events, which took place in this region during the XX century, had a great influence on the United Kingdom as a whole, its structure, domestic and foreign policy. Therefore, the main purpose of this research is to highlight the most important aspects of this movement.

The Perspective of US-Russia relations/ Перспектива развития отношений между Россией и США

International relations between Russia and the USA have worsened during the last 5 – 7 years. A big question arises what awaits the relations between Russia and the USA? Some theorists argue, if it is possible to find common ground after Trump got the power and became the president of the USA. Others proclaim that his statements and promises are just empty rhetoric. What do political scientists think about the future of the relations between Russia and the USA? What will happen next and what should we expect: intensification of international cooperation between the countries or a renewal of the Cold War?

How do American writers rule the world?/ Как американские писатели управляют миром?

Having chosen the United States of America for the research, we, however, decided to consider its cultural heritage at an unusual angle, namely: how has the use of English by the American writers influenced the World history? If to speak more particularly, in this research we try to find out how famous politicians' favourite books influenced their personalities, careers and views. So, our tasks are to make psychological portraits of politicians on the basis of their preferences in literature and to analyze the influence of the books on the policy style of a person. Our purpose is to give the corresponding forecast based on the obtained data. The relevance of the topic is connected with active political changes on the world scene, so it is necessary to give the certain forecast capable to clear up the events in the political realm.

Youth policy in Russia and the United States: general and differences/ Молодежная политика в России и Соединенных Штатах: общее и различия

For understanding key features of youth policy of these countries, we investigate political departments and explore different Internet resources and books. In our project, we use comparative analysis and research state systems in the sphere of youth policy, main trends and directions of the both countries. At the federal level, both Russia and the US have two offices dealing primarily with youth. However, in the United States the Interagency Working Group on Youth Programs brings together 18 federal departments and agencies in an effort to collaborate and harmonise youth programs. The Office of Global Youth Issues is attached to the Department of State and works globally with agencies and embassies through more than 70 youth councils. In the Russian

Federation the Ministry for Education & Science supervises the work of the Federal Agency for Youth Affairs (FAYA), which is responsible for the implementation of the youth development strategy (2013). The FAYA coordinates public efforts in fostering youth opportunity and development and takes a human capital approach. According to the FAYA, youth policy is devolved to regional “subjects”, which have their own state youth authorities, and youth policy action.

The phenomenon of coffee - Myth or Reality?/ Феномен кофе: миф или реальность?

“Coffee is the favorite drink of the civilized world” (Thomas Jefferson). Coffee is more than popular: it is pervasive. It can be seen practically everywhere: in offices, during coffee-breaks, at universities and shopping malls, on kitchen counter tops and on the streets. There are lots of coffee houses in every town of our big country. So, why is it so popular? Why people of different ages prefer to drink coffee, enjoying its delicate aroma? In our report, we will try to answer these questions.

The plan of our presentation:

- The history of coffee: from beans to a paradise drink;
- Coffee industry: Starbucks phenomenon;
- Coffee as an essential part of the US society;
- Coffee as a “startup” foe the younger generation;
- Psychological research: is a popularity of this drink myth or reality?

Mediatization in the modern US public policy/ Проблемы медиатизации в современной публичной политике США

In my report, I would like to analyse what is mediatization in the modern world and how it appeared and is working in the US. In this framework, an important aspect of general modernization is the development of media, beginning with changes in communication media and proceeding to subordination of the power to prevailing influential institutions. The mediatization policy means political transformations in the media, something we saw during the US presidential elections, the struggle for electorate, carried through the media and the Internet.

Ideological tendencies of the North American abolitionism of the 19th century/ Идеологические течения в североамериканском аболиционизме 19-го века.

The report focuses on the research of American abolitionism in the 1830-1870. The urgency of this work is linked to a problem of racial discrimination, which still remains in the USA. The report shows two main wings in the American abolitionism: non-resistant abolitionism of W.L. Garrison and a revolutionary abolitionism of Frederick Douglass. Abolitionism was urgent, even when Lincoln signed the Emancipation proclamation in 1863, because racial problems became sharper after the Civil War in the period of Reconstruction.

How do Russians and Americans perceive each other? / Как русские и американцы воспринимают друг друга?

Nations have different mentalities, languages and traditions. We know some of them from the media resources whereas we have never seen the real examples. That is why we keep on believing in stereotypes about the citizens of other countries. It is always interesting to find out what image people of other nations have of Russians and vice versa. Where is the truth? And what can be called a myth?

Economic impact of immigration to Canada/ Экономические последствия иммиграции в Канаду

Canada is a strong player in the immigration scene. In fact, according to Canada's immigration programme, it has the highest per capita immigration rate in the entire world. Canada's prosperity is largely correlated with its immigration rates; it could well be the case that Canada would not hold its current place in the world political and economic stage without the benefit which immigrant labour has historically provided.

New Zealand: heaven or hell on Earth? (A project begotten in controversy between two dreamers)/ Новая Зеландия: рай или ад на Земле? (Проект, рожденный в споре двух мечтателей)

New Zealand appears to most people like a paradise on Earth. The country does not cease to occupy leading positions in a variety of world rankings. The high standard of living, quality education and medicine, the absence of corruption exalt it above other countries. People think that New Zealand is the image from the "Lord of the Rings" with fabulous scenery and eternal summer. But what do they hide under the guise of an "ideal state"? Severe climate, remoteness from other continents, constant earthquakes and volcanic eruptions, high prices for products and services are not all the troubles you have to overcome living in NZ. There are two sides, two independent viewpoints, two irrefutable truths.

Postmodernism in Australian literature/ Постмодернизм в австралийской литературе

Postmodernism has become widely recognized as a movement consisting of an epic scope, innovative techniques and wide ranges of psychological and intellectual impact. It appeared as the consequence of World War II and its pioneers were generally American and European authors. Despite being relatively young, Australian literature has become an inseparable part of world literature with a huge contribution in it. The aim of this research is to focus on the most influential and notable postmodern Australian writers.

Миграция в Австралии: современные противоречия/ Migration into Australia: current contradictions

On February 2, the Australian Government was charged with awful migration policy by "Euronews". According to the statements, refugees were allowed to stay just in Papua New Guinea in special shelters that looked like concentration camps. This situation finished after Supreme Court of Guinea recognized the Australian case to be unconstitutional. However, mass media is still informing the global community about violations of refugee rights. At first glance, it cannot be true, because Australia is globally known as the country of immigrants, so that is why this problem should be studied.

Pakistan: a struggle for independence or a toy in world superpowers' hands?/ Пакистан: борьба за независимость или игрушка в руках супердержав?

After Pakistan's secession in 1947 from India, tensions between the states are becoming stronger year to year. Although the original reason for this territorial transformation lies in religious contradictions, the issue has become a political one. Pakistan, where the majority of population is Islamic, is teeming with terroristic groups. They are sure that they struggle for Pakistan territories, occupied by India, and for the state's independence. But why do the USA, China and Russia take part in India-Pakistan conflict? Does it mean that Pakistan is independent at all?

The problem of poverty in India/ Проблема бедности в Индии

The report describes and analyzes the problem of severe poverty in modern India. Apparently, within ten years India will become the country with the biggest population in the world. There are two polar opinions upon the possible scenarios of the economic and political development of the country. Experts believe that India would either obtain success and leadership in the world or collapse because of its demographic, socio-economic and political problems. Poverty, inequality among the population due to the rigid caste stratification remain the main problems. The report suggests conclusions upon a number of problems in the sphere of economic and social policies of the country causing such poverty.

Specific features of English language and its meaning in social sphere in India/ Специфические черты английского языка и его значение в социальной сфере в Индии

The theme of my research is directly related to the characteristics of the English language in different countries. Because of my origin, I would like to tell about the English language in India. English in India has a number of specific features. India with a population of 1.1 billion has fewer than 200,000 native speakers of English. According to the Constitution of India, “Hindi in the Devanagari script” is the official language of the union and English the “subsidiary official language”, so English language plays an important role in the social sphere.

Puzzles of the monuments of megalithic culture/ Загадки памятников мегалитической культуры

Many of megalithic monuments have been found on the territory of Great Britain (and other European countries) and the USA. These monuments represent gigantic constructions made of huge stones. The connection between these monuments and burials, underworld cult seems to historians doubtless, but the most amazing and mysterious question about these artifacts is why people of megalithic epoch neglected the comfort of their own earthly life (the construction of these monuments called for titanic effort) for the construction of buildings associated with the cult of the dead. The information about megalithic people's perceptions of the afterlife will help to find an answer to this question.

The pub in Great Britain as a social and cultural phenomenon / Паб в Великобритании как социально-культурное явление

The pub (English. Pub - an abbreviation of Public house, literally 'public house' within the meaning of the gathering place of the population) – is an establishment that sells alcoholic beverages for consumption inside or outside of the premises. Traditionally pubs have existed in the UK and Ireland constituting an important socio-cultural element in these countries. Nowadays pubs are also found in countries that were experienced the powerful British and/or Irish cultural influence - such as Canada, Australia and New Zealand, to a lesser extent, the USA. Pubs are found in other countries, but they are not predominant drinking establishments and are perceived mainly as an element of the 'exotic' British national colors.

In our report we try to highlight the most interesting details associated with the culture of pubs, their audience, an etiquette and then give a comparative analysis between pubs in Russia (mainly in Moscow and in Saint-Petersburg) and in Great Britain.

Freedom of creative activity and the role of a writer in a bipolar world: a case study of Kurt Vonnegut's novels/ Свобода творчества и роль писателя в условиях биполярного мира на примере американского писателя Курта Воннегута

In his famous novel "Slaughterhouse – Five" Kurt Vonnegut shows us the tragedy of war. The greatest strength of the novel became an approach that led readers through the nightmares and atrocities of the war. The novel carries plenty of social and political satire and does not lend itself to an unusual rational analysis, being a mixture of realism, fantasy and bitter irony. Vonnegut created a pacifist novel, where he described devastating consequences of war which exert a tremendous pressure both on society and personality. The novel is filled with a deep sense of compassion for the fate of an ordinary man.

Stoicism in modern life of the US and Seneca/ Стоицизм в современной жизни США и Сенека

It is interesting that Stoicism still influences modern life and especially American life. For instance, Marcus Aurelius's Meditations is one of Bill Clinton's favourite books. James Stockdale, U.S. Navy vice admiral and Medal of Honor recipient, who was held captured for seven years during the Vietnam War, wrote that 'stoicism saved my life'. One can say that Stoicism has become an unofficial philosophy of the USA military. At the same time, it has a strong influence on CBT (Cognitive behavioral therapy), which traces back to Victor Frankl's logotherapy and annually the multi-disciplinary team 'Stoicism Today' organizes a 'Stoic Week' where everyone has an opportunity to live like a Stoic for seven days. In these circumstances the texts of Stoics and particularly of Seneca take on a new significance.

Networked learning/ Сетевое обучение

Since the 20th century in education there has been a very popular discussion on a method of maintaining and developing connections between both "people to people" and "people and information" so as to improve the process of learning. John Seely Brown, Jean Lave and other philosophers and anthropologists from the United States of America have developed new concepts of supporting education, sharing information and establishing networks.

The American dream: illusions and reality / Американская мечта: иллюзии и реальность

The report aims to show that Jack London was the first to describe how hopes and aspirations associated with the American dream fell through in the real life. In his novel "Martin Iden" he subjects the American reality to devastating criticism by exposing the vices of a capitalist society. The novel is supposed to be the first to start this tradition which was later developed by such outstanding American writers as F.Scott Fitzgerald and T.Dreiser.

The language situation in the South African Republic as a reflection of struggle for national identity/ Языковая ситуация в Южноафриканской Республике как отражение борьбы за национальную идентичность

South Africa is a multiethnic society encompassing a wide variety of cultures, languages and religions. There are 11 official languages, two of which are of European origin: Afrikaans and English. As political events are developing it is becoming increasingly clear that local languages begin to play an important role in different parts of the country. The report attempts to show the problems the government faces trying to strike the right balance between various social, ethnic and religious groups in their language policy.

Hindi and English: features and tendencies of development/Хинди-английское двуязычие: особенности и тенденции развития

There are lots of languages in India. But the most important of them are Hindi and English. The appearance of Hinglish is connected with the British conquest of India. Hinglish differs from English mainly by the use of a large number of special pronunciation patterns and the absence of grammar rules. The report covers and analyses some peculiarities of the “double”- language communication in India.

Encountering the East, the problem of capitalism in India / Столкновение с Востоком: проблема капиталистического строя в Индии

It is well known that the European empires used to extend their territories, exploiting local people and imposing western standards to fulfill the needs of Europe. India was not an exception. However, the capitalist system dealt a heavy blow to the whole nation of India leading to destroying traditional forms of agricultural economy. In this report, these problems are to be stated and discussed.

Перспективы развития деятельности неправительственных организаций в США / The future of non-governmental organizations in the United States

A great variety of NGOs in the US is famous for their considerable activity. The scope of activity of NGOs is extremely essential in the world arena and their significance will be strengthened increasingly in future. However, a lot of critics claim that NGOs with their flaws don't have a bright future and even have a detrimental influence on the world community. Thus, the issue about the future of NGOs in the US seems to be controversial.

Проблема понимания разницы между «знанием» и «информацией» в современном обществе в американских социологических теориях конца XX — начала XXI века/ Problem of understanding the difference between "knowledge" and "information" in modern society in american sociological theories of late XX — early XXI century

Modern society has a set of names in sociological theories. They are: consumer society, society of goods and services, post-industrial society, superindustrial society e.t.c. But it is always treated as information society where the most important role plays the information. Information surrounds the person everywhere. We receive it from massmedia, scientific literature, from friends and so on. Information is a valuable resource for modern society. But most people in everyday life sometimes confuse what they find: information or knowledge, because love to knowledge, not to information, is inculcated to every person from childhood. However modern society is called "information" society, without "knowledge". So what is the difference between them? Answers to this question are contained in many sociological theories, particularly in the works of the USA researches of the late XX — early XXI century.

Проявление национальных ценностных ориентиров в процессе межкультурной коммуникации австралийцев / Presence of national valuable orientations in the process of cross-cultural communication of Australians

This report describes problems of Australian national character and their communication features. The language that Australians use for their communication is almost unlearnable. This is because they transform words and phrases for their own convenience. A cheerful temper of Australian people makes them use humorous phrases instead of usual expressions. National character traits of Australians are simpleness and credulity, but it should be mentioned that there was a colonial period in history of their society which also left a mark on the specifics of interaction. So, the sphere of communications in Australia is relevant for a sociological study.
