# ФАКУЛЬТЕТ ИНОСТРАННЫХ ЯЗЫКОВ И РЕГИОНОВЕДЕНИЯ

## ПЛЕНАРНОЕ ЗАСЕДАНИЕ

20 марта 2019 г. 13.00 – 16.00 ФИЯР,  
Ленинские горы, д. 1 корп. 13-14, Ауд. 241

*Руководитель: Кочетова М.Г.*

**Mitchell-Fox Kathleen Lillian/ Митчелл-Фокс Кейтлин Лиллиан**

Faculty of Modern and Medieval Languages, Cambridge/ Факультет современных и средневековых языков, Кеймбридж

**The welfare state in modern Britain/ Государство всеобщего благоденствия в современной Великобритании**

‘From cradle to grave’. Created in the years after the Second World War, the NHS is considered the heart of the British welfare state. It provides free medical care to all those in need. Other aspects of the welfare state include school meals, minimum wages and social security. As such, the welfare state is credited with being the backbone of modern Britain and yet its position in British society has become increasingly precarious over the past decade. Not only has the government moved towards the privatisation of these services, but also the very terms of life under the welfare state have changed.

**Roxanne Petra Alexandra Elson/ Роксання Петра Александра Элсон**

The University of Leeds/ Университет г. Лидс, Великобритания

**British political parties today and how they have changed from their historical roots/ Британские политические партии: современное состояние и историческая эволюция**

The main political parties within the political sphere of the UK have been around for many years, their rhetoric and political alignments changing throughout history. This talk will focus on the two main political Parties, Labour and Conservative, showing how both have changed throughout history to meet the demands of the times they are working in, and to analyse how different each is from their historical roots.

**Kozubov Artem/ Козубов Артем**

Faculty of Political Science/ Факультет политологии

**The phenomenon of fake news being used as a political weapon/ Поддельные новости как политическое оружие**

Increased media polarisation on both sides of the political spectrum has created a crisis of belief in objective truth, resulting in an unprecedented erosion of confidence in American institutions. As a result, this could have a major impact on Western democracy's future. People are struggling to distinguish actual facts from fake news, which in turn causes a collapse of trust as institutions in the media and government. This perpetuates a climate of instability and a lack of rational discourse necessary to solve some of the biggest problems facing the country.

**Lukashova Anna/ Лукашова Анна**

Faculty of Political Science / Факультет политологии

**The Gaelic language: dead or still breathing? A case study of the Irish national language as a factor in identity/ Гэльский язык: уже мертвый или еще живой?**

### **Анализ функционирования Ирландского национального языка как фактора идентичности**

The report is aimed at the deep and consistent review of the Gaelic language as a national one and its role in daily lives of common Irish. This study is based on the role of the Irish national language in the socio-cultural context of Ireland.

The purpose of this research is to identify the historical context of the development and preservation of the Irish national language and to analyse its relevance in Ireland from legal and socio-cultural points of view. Moreover, one of the main tasks of the author is to present and analyse the statistical data through which it becomes possible to define the mass use or disuse of the language. Therefore, the scientific and practical relevance of this work is substantiated with the consideration of interviews conducted personally by the author with the Irish people – native speakers of Gaelic.

### **Mitrofanova Anastasia/ Митрофанова Анастасия**

Faculty of Foreign Languages and Area Studies/ Факультет иностранных языков и регионоведения МГУ имени М.В. Ломоносова)

### **Emotional intelligence studies in the UK, the USA and Russia/ Исследования эмоционального интеллекта в России, США и Великобритании**

The presentation focuses on the concept of EQ in the area of language teaching. Considerable attention has been given to the studies of teachers' EQ, only few of them were performed in the Russian educational context. The presentation compares the ways and the extent of work that is done in the USA, the UK and Russia to develop the EI skills of language teachers. The research has shown that there is a wide range of private EI development programmes for teachers in the USA; however, the only course for the language teachers was found in the UK. As for Russia, only one EI development programme for teachers has been found.

## ФИЛОСОФСКИЙ ФАКУЛЬТЕТ

**The importance of William Blake's philosophical ideas today/ Актуальность философских идей Уильяма Блейка сегодня**

It will be difficult to overestimate the influence that William Blake exercised on English literature in general and on philosophical ideas of his time in particular. As any genius, he touches upon such universal issues as life and death, love and hatred, freedom and order. His poems are permeated with such philosophical themes as the immortality of the soul, the power of love, man and his place in the world. So deep his philosophical ideas are that he is considered to be one of the predecessors of C.Jung and S.Freud.

**Radical sacrifice and Christian narratives in Oscar Wilde's «The Fisherman and his soul»/ Радикальная жертва и христианские нарративы в сказке Оскара Уайльда «Рыбак и его душа»**

This report is set to examine several points, associated with the artistic representation and Christian narratives of Oscar Wilde's heritage, with regard to several researched texts. Furthermore, a short comparative analysis of Oscar Wilde's "The Fisherman and his soul", and passages in Heinrich Heine's "Atta Troll", are meant to be a profound part of the conducted study. The central argument of the fairy tale is that the fisherman's wish to lose his soul has created both new possibilities and new dilemmas, and these contradictions cannot be reconciled or solved.

**The influence of the Black Death on the worldview of medieval England/ Влияние «черной смерти» на мировоззрение средневековой Англии**

The Black Death raged in England from 1665 to 1666. The consequences were terrible. The epidemic covered the whole country and especially the capital - London. Was this a

curse or a terrible warning from God? This report approaches this natural phenomenon through a system of philosophical aspects: man in the world of things and symbols; man and the other; man and death; man and God.

**The Beatles as the founders of the 'British invasion' and its influence on modern culture and the global community/ Группа Битлз как основоположник британского вторжения и ее влияние на современную культуру и мировое сообщество**

The report considers the British cultural phenomenon of the Beatles, the group's history and its influence on many areas of society. The Liverpool-born quartet changed the minds of young people in the 1960s by publicly criticising racism in the USA and American aggression in Vietnam. In fact, their opposition to hostilities served as the beginning of the rise of the 'hippies' and led to the «beat generation». The report also explores contemporary musicians and other cultural figures who began their careers under the influence of the Beatles.

**The origins and specific features of Pre-Raphaelite Art/ Истоки и особенности живописи Прерафаэлитов**

The Pre-Raphaelite Brotherhood (PRB) brought notoriety to British art in the nineteenth century. Bursting into the spotlight in the mid-century, they shocked their contemporaries with new kinds of radical art. This report explores the origins of the Brotherhood, its great achievements and the influence it exerted on subsequent artists. For many people the idea of Pre-Raphaelite art is formed by images of beautiful women with long, luscious hair, but the Brotherhood's early work was very different from these later works. The first paintings controversially apply the new realism to Gospel subjects. Then, a decade before the French impressionism, their brushes captured unattractive subjects from urban life.

**Diaghilev's Ballets Russes; The impact this has had on the culture of European societies/ «Русские сезоны» Дягилева: влияние русского искусства на европейскую культуру**

The purpose of the study is to examine how the ballet enterprise was created by the Russian impresario Sergey Diaghilev and the way it became a phenomenon of artistic synthesis. Picasso, Matisse and Coco Chanel took an active part in preparing the sets, whereas Stravinsky, Satie, Prokofiev and Debussy created music. This report puts an emphasis on how and why Diaghilev's seasons had a great influence on European cultural life (particularly, in Britain and France).

**The influence of philosophers on the policies of Barack Obama/ Влияние философов на политику Барака Обамы**

The forty-fourth President of the United States, Barack Obama, has left a deep mark on the public life of America. Whether his political decisions were rejected or supported, they did not leave anyone indifferent: his primary health care reform or “Obama care” is a prominent example of that. Behind all changes there was painstaking work on his world outlook. Obama has read a lot: the philosophical works of fellow American citizens were very important to him. Thomas Jefferson, James Madison, Paul Tillich were those thinkers who influenced his decisions a lot. Barack Obama placed emphasis on the works of the “Founding fathers”, as well as the American theological tradition, which became the general trend of Obama’s liberal course. We are going to underline and clarify this theme.

**Hegel's reception in American philosophy: Catherine Malabou and the concept of "plasticity"/ Рецепция Гегеля в американской философии: Кэтрин Малабу и концепт «пластичности»**

Hegel is known to be one of the most important figures in the history of philosophy. Although he was severely criticized throughout the XIX<sup>th</sup> and XX<sup>th</sup> centuries Hegel still influences present-day thought. In this respect what seems to be even more exciting is that some modern thinkers try to connect Hegel's conceptual apparatus with recent scientific discoveries, and neuroscience is no exception. For example, Catherine Malabou, a philosopher and a specialist in neuroscience, strives to apply Hegel's concept of "plasticity" to the activities of human brain. My report is supposed to examine some problems of and perspectives on this project.

**Colour as an element of directorial vision in the American film industry/ Цвет как элемент режиссерского решения в американском кино**

On the basis of a theoretical and historiographical review of cinematic studies, as well as through the application of analytic methodology on American cinematic art, a preliminary conclusion has been drawn that colours in a film have, not only their own unique developmental logic, but also both laws and stages of artistic and expressive means of attraction, and, moreover, display a perfect harmonic component in the film. This tentative conclusion is essential for a subsequent conceptual analysis of specific works of modern cinema.

**Ethics and artificial intelligence; A look through the prism of American scientists' positions/ Этика и искусственный интеллект: взгляд сквозь призму позиций американских учёных**

The concept of «strong AI» is popular nowadays. Scientists believe that a computer, when programmed appropriately will actually represent some kind of consciousness, which will possess cognitive states. This kind of AI will be very similar to a human. Therefore, we ask: is it possible to attribute to AI the capacity for ethical evaluation, which is one of the features specific to humanity? Based on the American physician, Robert Burton's, opinion delineated in his book "Mind and Brain", and Nicole Gage's view (her book in collaboration with Bernard Baars is called "Brain, Cognition, Mind"), we will try to answer this question.

**Political behaviour in the theory of Paul Lazarsfeld/ Политическое поведение в теории Пола Лазарсфельда**

This report analyses a method, developed by Paul Lazarsfeld, an outstanding American political scientist, in 1944 with a view to find out reasons why "people decided to vote as they did". Having analysed three presidential campaigns in the USA, Lazarsfeld proposes a new method which he calls «the panel technique». The results of the research led to the conclusion that sometimes face-to-face communication can be more effective than traditional media outlets such as newspapers, TV, radio.

**The idea of service in the culture of knighthood in medieval England/ Идея служения в рыцарской культуре средневековой Англии**

The basis of the culture of knighthood was the idea of serving someone and something greater, which was both more important and more beautiful than any of the values of ordinary life. Knightly orders embodied the concepts of honour and valour. They were not ordinary warriors. The will and discipline to follow the moral norm were essential. Knights did not fight against someone, but always for noble causes and truth, for those who needed help. They served justice, honour, their beloved lady and faith. The legendary image of King Arthur and the Knights of the Round Table with their mission to defend justice became role models for centuries.

In human nature, there exists a morbid desire to explore the darker realms of life. As sensitive beings we make every effort to deny our curiosity in the things that frighten us, and will calmly reassure our children that there are not any creatures under their beds each night, but deep down we secretly thrive on that cool rush of fear. In this report, we will discuss the specific of writing horror stories by comparing two the most popular and famous authors of this genre – Edgar Allan Poe and Stephen King.

**The political philosophy of anarchy-capitalism; A stateless society/ Политическая философия анархо-капитализма: безгосударственное общество**

The concept of a stateless society has always been the subject of growing controversy with issues being raised about the elimination of state and power in favor of self-ownership, private property and free markets. It is equally absurd to dismiss the idea of a stateless society as it is to deny a possibility of such a state. This report discusses how a stateless society would change our relation to courts, law enforcement bodies, money, taxation, personal and economic activities.

**The economic consequences of international migration for modern London/ Экономические последствия внешней миграции для современного Лондона**

The report is dedicated to the influence of massive immigration on some economic indicators in London. The role of migration in the formation of London population is hard to overestimate. London attracts much more international migrants than any other city in the UK. The population of London has increased greatly lately due to immigrants from all over the world. Immigration leads to ethnic stratification and affects ethnic makeup. All these factors influence such economic indicators as house prices in different districts of the city and the structure of the working population.

**The use of social spaces in organizations: the USA and the UK/ Социальное пространство в организациях: США и Великобритания**

Enterprises and organizations can be considered not only as a physical space, but also as a social space. Organization as a physical space is a complex of premises, workplaces, equipment and people. However, this is not enough to explore the essence of the organization and its work. In the course of researching the problems of an organization, it is necessary to admit the existence of the social space in which the organization manifests itself precisely as a social system. It manifests itself as an integrity consisting of elements, each of which is directly or indirectly connected with other elements. It is in the social space where those activities are carried out. They are related to the management of cooperation, interaction of the subjects and business communication between the subjects. The report examines the social space of the United States and Great Britain, shows their features and differences.

**Life expectancy forecast for the USA and Canada: a comparative analysis/ Прогноз ожидаемой продолжительности жизни населения США и Канады: сравнительный анализ**

The report analyzes the age structure of population mortality in the USA (1933-2013) and Canada (1921-2011). The study uses demographic data from the Human Mortality Database. Based on the life tables, the dynamics of life expectancy at birth (LE) of populations in the USA and Canada (total, male, female) have been calculated. The research demonstrates the growth of LE during the period under consideration. This can be explained by decrease in mortality with increase in living standards and advances in medicine. Using the extrapolation method for demographic forecasting, LE projection for the USA and Canada until 2050 has been made.

**The development of digital railways: the UK experience/ Внедрение цифровой железной дороги: опыт Великобритании**

The transition of Great Britain to the digital railways means a change in the railway industry, the infrastructure of the city and a significant part of the country's economy. The main purpose of the detriment of the digital railway technology is the desire for sustainable economic growth, the transition to digital modernization. In this report, the author wants to focus on three main objectives of the project for the transformation of railways in the UK: the increasing number of trains, the improvement of connections and

the increasing convenience for the clients. To perform these tasks, it is necessary to make the train service available at any time and make the purchase of tickets easy. The main conclusion and prerequisite for the transition to the digital railway is the availability of the whizziest technologies for the project today.

**The education system: the meaning, aspects and social functions of education in England/ Система школьного образования: значение, аспекты и социальные функции образования в Англии**

The British education system is one of the most conservative in the world, which could be attributed to the historical age of the educational system, dating back to the XII century with the first high schools in the country and the University of Oxford. To this day, discipline and the high-level of quality teaching remain the main features of the British educational system.

Secondary education in England includes four main stages: primary from 5 to 7 years and from 7 to 11, secondary for children from 11 to 14 years and from 14 to 16. The set of core subjects varies depending on age. From 14 to 16 years students are preparing for the exam GCSE (General Certificate of Secondary Education – Certificate of Secondary Education). However, such long-established structure does not mean that British education system has not evolved. The English education system not only keeps pace with the times, but often gets ahead of the curve, anticipating the needs of the new generation: the pursuit of excellence and respect for traditions here perfectly coexists with the latest educational programs and practices.

**Immigration as a problem in the USA and its influence on the population / Проблема иммиграции в США и ее влияние на население**

The USA as a state was created by emigrants who came from Europe. Since the time of their foundation the American states have adhered to fundamental principles of loyalty to immigrants. Yet the first legislative acts directed against immigrants were issued in the middle of the 19th century. The process took the form of rigorous selection based on national-racial affiliation that led to racial segregation and racial discrimination. Nowadays the problem of immigration is one of the most acute in the country. Some of its manifestations have caused serious conflicts within the state. The immigration and its consequences are being widely discussed in the USA. In this study we will try to define

whether in the USA there is a firm commitment to distinctly aggressive policies towards immigrants or we witness some activities undertaken to preserve national identity and culture.

**Schooling patterns within the education system as a reflection of class stratification in Australia/ Модели обучения в системе образования как отражение классовой стратификации в Австралии**

Australia has become one of the leaders in the international education market in the past decades. Its schools and universities enjoy great popularity all over the world. Nevertheless, there is a problem of inequality in educational levels in the country. This report is supposed to reveal the obvious shortcomings in the Australian education system. We also analyze the impact of class stratification on learning models. The first part of this study deals with the structure of the Australian education system. Here we are going to consider differences existing between Australian and Russian education systems. The second part of the report is devoted to the problem of stratification. The analysis data are taken from the report of the Australian Centre for Policy Development (CPD) "Uneven playing field the state of Australia's schools" of 2016, in which the authors are analyzing the current problems of the education system, in particular financial aspect. The experts are predicting future development of schooling patterns and they are also making recommendations how to cope with the existing problems.

**The origin of gender studies in the United States; Women's studies / Зарождение гендерных исследований в США: женские исследования**

Gender studies as a systematic academic discipline appear in American colleges and universities in the late 1960s. Women's studies are the initial stage of gender studies. Currently, women's education departments are available at most US universities. In addition, similar programs are currently being taught in a number of secondary schools and general education colleges. Women's studies were developed due to the insufficient presence of women in power, discrimination at work and in the legal system, as well as the lack of protection from male dominance in various spheres of the family and the professional life.

**Population change in Canada as a social problem/ Изменение населения в Канаде как социальная проблема**

Canada is a particular country especially if we consider the structure of its population. Canadian population is ethnically diverse. Many centuries ago migrants from European countries came and settled in Canada, so at present the country's population consists mainly of descendants of the UK – the British constitute 40%, those of France - 27 %, immigrants from other European countries comprise 20% , while indigenous population makes up only 1,5 %. In this study we analyze the composition of Canadian population as presenting some social challenges. We are trying to trace the structure of this country's population from the beginning the 16<sup>th</sup> century in order to show the dynamics of its growth. We also examine such social issues as population density, birth rates, mortality rates and life expectancy. Using the data taken from original scientific sources we have managed to identify existing social issues.

**Distance learning as the future of education within the universities of Great Britain and the USA/ Дистанционное обучение как будущее образования в университетах Великобритании и США**

The report investigates the issue of distance learning within the universities of Great Britain and the USA nowadays. First, the authors explain why this issue is relevant. Then, the report outlines the history of this notion. Secondly, the work considers positive and negative sides this new system of education has. Moreover, there is an overview of distance learning practices in other countries.

**Post-election protests against D. Trump / Послевыборные акции протеста против Д. Трампа**

The Trump phenomenon, which won the 2016 election, is a bifurcation point, as the support of the majority of the United States population for such a candidate has revealed many problems in the society. Trump's victory showed the need for many people to change the left-liberal course of the government. However, despite the approval of the majority, many people were categorically against the slogans of the new President, considering them sexist, racist and homophobic. Literally, immediately after the results of the vote were announced, mass protests began in the United States. The report attempts to analyze these manifestations of discontent, reveal their causes and give some forecasts to Trump's presidency.

**Oscar controversy: the policy of double standards/ Противоречия премии Оскар: политика двойных стандартов**

This research is aimed to investigate the Oscar Academy Award policy of the last decade. Latest nominees and laureates clearly illustrate the clash of public opinion and choices of Academy voting membership. The purpose of the report is to examine the evolution of this phenomenon and its influence on the film-making industry and civil society.

**The shutdown phenomenon in the USA; An analysis and future prospects/ Явление приостановки работы правительства США: анализ и будущее феномена**

This report investigates the phenomenon of the US government's shutdown. First, the authors review the history of shutdowns in general. Secondly, its influence on the US society is considered. Furthermore, the work aims to analyze the impact of such events in the past decade and to discuss the current situation in the United States. In conclusion, the authors try to make some predictions based on the research.

**The Roaring Twenties phenomenon; Case studies of Great Britain and the USA/ Исследование феномена «ревущих двадцатых» на примере Великобритании и США**

This report considers one of the brightest periods in the world history – the Roaring Twenties. Using the examples of Great Britain and the United States, it describes different aspects of human life in the 1920s: from scientific developments to the latest fashion, from economic breakthrough to popular music genres etc. The author analyses characteristic features of the phenomenon in two different countries and provides a comparative analysis.

**The Hundred Years' War's influence on English politics/ Влияние Столетней войны на английскую политику**

The Hundred Years' War lasted for 116 years and was one of the longest wars in history. Generations were born and died. Both France and England spent a lot of resources to win this war and were tied at the end of it. These factors provided many opportunities for the political changes inside the states and in their foreign policies as well as in terms of reviewing their goals.

**The economic and political implications for Britain after Brexit/ Политические и экономические последствия для Великобритании после Брексита**

In 2018, the most discussed topic among many popular political publications in Europe was the fate of Great Britain and the European Union. This report is aimed at revealing economic and political changes that will take place in the UK if it leaves the European Union. The authors try to identify the best possible way for UK. The key points of the report are:

- 1) New UK's connections;
- 2) Great Britain as a financial center;
- 3) Migration issue;
- 4) The tourist industry;
- 5) The future of northern Ireland.

The authors have used the most objective opinions of political scientists and have employed the experience of the political research seminar as well as other reliable sources.

**A study of British policy regarding homeless people / Британская политика по отношению к бездомным**

Homelessness is one of the most hazardous problems in the UK nowadays. More than 5 thousand people slept on the streets every night in 2017. It does not only effect crime level but also increases drug distribution. By 2022, the authorities promise to cut the number of homeless people in half, and in nine years to get rid of the problem completely. The report strives to determine whether the authorities overvalue their abilities and whether it is possible to eradicate homelessness.

**The English radical tradition and the British Left of 1885-1945/ Английская радикальная традиция и левое движение в 1885-1945 годах**

This English radical tradition became deeply entwined with the history and development of the British labour movement and inspired its major intellectual figures. It was a tradition used and shaped by political events, as each group sought to legitimise its own ideological position through the continual reference to an older democratic past. In this research, there is an attempt to explore this continual engagement with the British past.

**A history of US foreign policy in Latin America up to Donald Trump's presidency / История латиноамериканского направления внешней политики США, включая период президентства Дональда Трампа**

The report, devoted to US policy in Latin America under Donald Trump's presidency, concerns the author's future thesis. Being a very charming profitable region and not pursuing belligerent foreign policy, Latin America has no double standards. The author considers two famous leaders - V. Putin and D. Trump, both seeking the accomplishment of their goals to make their countries prosperous. Russia and the USA both have their own interests in Latin America competing in the region. The historical aspect of US foreign policy in Latin America is also important. The author dwells on the influence of Russia on Latin America and the role of D. Trump's policy, as well as suggests a possible way out of the conflict.

**The British: who are they? / Англичане - кто они такие?**

This paper analyses extremely complicated, long and fascinating history of formation of the modern British ethnos. It considers not only the ancient period of the Roman conquest of the British Isles in the 1<sup>st</sup> century CE but also the times of the Norman Conquest in 1066 CE. It highlights cultural and ethnical processes that affected people who lived in England in different eras, ranging from the Latin influence on the British to the Norman and French impact. This brief analysis helps understand that it is studying history that facilitates us to get the right understanding of current issues.

**White slavery in the British Empire's territory as an unknown chapter in the history of slavery / Белое рабство на территории Британской империи как неизвестная страница истории рабства**

It is well known that African Americans in the USA are the descendants of slaves that were brought from Africa in the 17th–19th centuries. However, just a few know that in the 16th-17th centuries there were many white slaves in the USA. After Oliver Cromwell's invasion of Ireland, thousands of native people were enslaved and sold in British colonies. This is the unknown chapter in the history that is under-explored within academic community. The fact of white slavery seems to upturn all stereotypes and clichés about slavery suggesting that racism was not the main reason and measure of enslavement.

**Youth unemployment as a humanitarian challenge to modern British society/ Проблема безработицы среди молодежи как гуманитарный вызов современному британскому обществу**

Youth unemployment can be defined as a time bomb waiting to explode. Today, due to the negative impact of the global economic crisis and the expected consequences of Brexit, unemployment is not only a term from a book on economics, but also a harsh reality. The imminent problem associated with youth unemployment presents a significant challenge to the British government.

The report analyzes social and economic causes of youth unemployment, its current and inevitable consequences, as well as the governmental approach to its solutions.

**The implications of the US withdrawal from Syria / Последствия ухода США из Сирии**

The US withdrawal from Syria was announced in December 2018, altering the power balance in the region. While the Assad regime is consolidating its grip on much of Syria, Russia appears the preferred stakeholder of all regional and local players. The Trump Administration has been faced with criticism within and outside the country, considering the likely strengthening and spread of Iranian presence in the region. The latter endangers its regional rivals, first Israel, leaving its regional ally Kurdish groups vulnerable against Turkish military operations to guard its southern border in the region.

**Donald Trump's wall: the U.S.-Mexico border/ Стена Дональда Трампа: граница США-Мексика**

Building a wall on the border of Mexico is one of the main pre-electoral promises of Donald Trump. The President of the USA was sure of the fact that the protective structure will defend Americans from drug dealers and «bad guys». The idea of building a wall on the border of Mexico is not new. The building of protective structures on the border of the USA and Mexico began in 1993 in the aim of preventing illegal immigration. D.

Trump's decision concerning the building of a new protective barrier was not supported by the Americans. The government of Mexico, liberal mass media in the USA, democrats, and ecologists were also opposed to this decision. The conflict between Trump and Congress led to different negative consequences. Among them is the most long-term shutdown in the history of the country that led to the temporary stopping of the work of government structures and entering a state of emergency.

**The essence of Brexit impasse and its impact on the current state of European policy / Особенности тупика Брексита и его влияние на текущее состояние европейской политики**

This report is devoted to the analysis of the peculiarities of Brexit impasse, though the main emphasis is made on the circumstances of such an issue and its impact on the current European policy. It shows that such a situation was caused by the defeat of the Conservatives in Parliament's voting about the withdrawal agreement in January 2019. Since then the situation with Brexit has become unclear as the issue of Irish backstop is not solved and the term of the withdrawal may be postponed to an uncertain period. Finally, this research has revealed that such a background to Brexit impasse may make any cooperation with the EU difficult and the exit from the impasse uncertain.

**The main features of the United Kingdom's contemporary relations with France and the Federative Republic of Germany / Особенности современных отношений Великобритании с Францией и ФРГ**

The United Kingdom, being part of the EU big Three (referring to Germany, France and the UK) has long maintained dynamic and fruitful relations with these countries, especially in security and defense cooperation areas. However, the UK's decision to leave the EU will inevitably produce a certain impact on the country's bilateral relations. According to recent studies, the United Kingdom is supposed to strengthen its security and defense alliance with France. Germany's limited military capacity is regarded as a factor that will continue to place significant limits on two countries' collaboration.

**The Ukrainian autocephalous movement through the eyes of the English media/ Украинское автокефальное движение глазами англоязычных СМИ**

The provision of autocephaly to the Orthodox Church in Ukraine is an important event for Ukraine and the Orthodox world as a whole. Ukraine is included in the list of countries with a separate national Orthodox Church. However, the existing split between the Ukrainian Orthodox Church of the Moscow Patriarchate and the newly formed Orthodox Church in Ukraine was not overcome, but only institutionalized. The position of the Russian Orthodox Church (as a party to the conflict) and Russia in this situation is very clear. Western countries, though not a party to this split, rather support the Ukrainian authorities in this matter. The media is very important in this situation as a mirror of the political process and an instrument of influence on public opinion. This report shows the results of analyzing publications in the English-language media on the Ukrainian autocephalous movement.

**The evolvement of India as an independent democratic state; A case study of M. Gandhi's ideas/ Становление Индии как независимого демократического государства: на основе идей М. Ганди**

The report examines the ideas of Mohandas Karamchand Gandhi about democracy, freedom and justice. It provides an overview of M. Gandhi's ethical, social and political attitudes. The authors conduct a detailed analysis of M. Gandhi's worldview, consider the influence of Gandhism on the consciousness of the Indians, and dwell on the methods for achieving the long-awaited independence of India. The problem of ownership, Gandhi's ideal of the state structure and the ethical principles set forward in the "Satyagraha" tactics are investigated. There is a further embodiment of Gandhi's ideals in specific areas of society including the concepts of social organizations, local movements and the formation of modern Indian politics.

**Water scarcity in India; An analysis/ Анализ нехватки водных ресурсов в Индии**

Nowadays India is suffering from the worst water crisis in its history and around 600 million people face a severe water shortage, according to a government think tank. Approximately 200,000 people die every year due to inadequate access to clean water and it's only going to get worse as 21 cities are likely to run out of groundwater by 2020. In the longer term, the undersupply will become even more acute in the South Asian nation, as demand increases with the 1.4 billion population growing at a rate of around 1 per cent. In our report we will discover the problem of Water scarcity in India: we will learn all about Causes of water scarcity, Impact on cities, Effects on animals and Counter measures.

**Health policy in India as an unconventional approach to medicine / Политика в сфере здравоохранения в Индии как нетрадиционный подход к медицине**

India is a country with a large territory and great population, so the social policy is of vital importance there. The sharpest social problem is medical treatment. Being a developing country India faces financial and transport problems while trying to provide medical supplies to each of its citizens. Besides, warm climate conducive for epidemics and low hygiene culture in the countryside make the situation more complicated. That is why the Indian government has created a special medical council (Medical Council of India) where traditional and non-traditional doctors consult about the main threats and medical problems. The report is to tell about the unconventional approach to medicine in India and homoeopathy in particular.

**The issue of trust in the context of social development in India / Проблема доверия в контексте общественного развития Индии**

The annual research “Edelman Trust Barometer” in 2018 published data on the trust level in the largest countries. Surprisingly, India was one of the states in this rating that took the leading place by all indicators with people there trusting business and the media as well as their government. This phenomenon is connected with the paradoxical nature of modern Indian society development, which, while preserving the archaic caste system and enormous social inequality, demonstrates high rates of economic growth. This trend is extremely important because good relations between decision-makers and public figures as well as between the civil society and the government are essential preconditions for social development. That is why this study is an attempt to analyze how traditional social structures and symbols, combined with elements of modernization, create a huge capital of trust.

**An analysis of Singaporean environmental politics: ecological problems and the ways to address them/ Анализ природоохранной политики Сингапура: экологические проблемы и пути их решения**

Nowadays Singapore is facing great ecological problems. It has to pay for enormous technological developments that have a negative impact on the environment. Ecological issues are of major concern for developed countries, therefore Singapore is now implementing cutting-edge methods and high-end tools. The experience might well save the world. This report describes the current ecological situation in Singapore, with considerable attention on prevailing problems. Moreover, the authors list specific measures used to solve the tasks. Finally, a conclusion is made whether it is both possible and worthwhile to apply such innovative techniques across the world.

**The difference between assisted suicide and euthanasia as a 21<sup>st</sup>-century problem/  
Отличие между суицидом с врачебного разрешения и эвтаназией как  
проблема 21 века**

Euthanasia is the practice of intentionally ending a life to relieve pain and suffering. There are different euthanasia laws in each country, which confirms the relevance of the topic. The report dwells upon the «good sides» of euthanasia considering its practical aim to help people to relieve their suffering and pain. The British House of Lords Select Committee on Medical Ethics defines euthanasia as "a deliberate intervention undertaken with the express intention of ending a life, to relieve intractable suffering». West's Encyclopedia of American Law states that "a 'mercy killing' or euthanasia is generally considered to be a criminal homicide" and is normally used as a synonym of homicide committed at a request made by the patient. So where is the key in this debate? A relief or still a doctor-approved suicide? The report attempts to answer these questions.

**National youth policy in the UK: the main trends and results / Государственная  
молодежная политика Великобритании: основные тенденции и результаты**

The United Kingdom is comprised of England, Scotland, Wales, and Northern Ireland. Northern Ireland, Scotland and Wales have 'devolved administrations', through which responsibility for a range of issues, including youth policy, is devolved to the legislatures of these countries. All four nations have recently developed new youth work strategies. In England, this has been underpinned by recent legislation. The Children Act 2004 provides the framework for youth policy in England, seeking to provide a new approach to the well-being of children and young people. Every young person is to have the support they need to be healthy, stay safe, enjoy and achieve, make a positive contribution, and achieve economic well-being. These five outcomes underpin all aspects of government policy relating to children and young people. In The United Kingdom the Children and Young People's Unit was set up within the government to ensure that the rights and needs of children and young people are given a high priority. It is also an important step for developing youth policy. The report considers all of the above aspects in detail.

**Comparative analysis of migration policies of the USA, Great Britain and Australia as factors in political life / Сравнительный анализ миграционной политики США, Великобритании и Австралии как фактора политической жизни**

According to the numbers provided by the UN, there are more than 200 million immigrants in various parts of the world, from America to Japan. How should we analyze and assess this fact? Are we facing a new Migration Period? Is it possible that this phenomenon is characteristic of the end of the 20th and the beginning of the 21st centuries? How should we deal with difficulties caused by migrant waves? The report considers the theoretical aspect of the refugee concept. It focuses on the issue of tightening migration policies in the USA, Great Britain and Australia viewed as their attempts to solve this problem by isolating themselves from the flows of refugees. The authors of the study try to identify the prerequisites for the migrant phenomenon in these states and seek to find answers to the above questions.

**Cargo cult and its political and philosophical meaning / Культ карго и его политико-философское значение**

Great wars and conflicts change many things around us. These things are not only material, but ideological, too. The Second World War in this sense was a period of a complete transformation of the world system and its philosophy. Many third-world nations, which had been unaffected before, came to be exposed to the influence of

modern countries. This disclosure caused different effects in their cultures. One of the most striking examples was a cargo cult followed by many Melanesian people. During the Second World War, their islands played the role of US marine and air bases. The cargo cult followers deified cargo that was delivered and dropped by American planes. Why did it happen? Why were American planes considered gods? The answer to these questions is the purpose of this research.

**Metamodernism in politics/ Метамодернизм в политике**

The report is devoted to the problem of changes happening in the policy passing from the state of postmodernism to the state of metamodernism in recent years. In political terms, metamodernism necessarily represents simply what ‘needs to be done’ to solve the global crisis: social transformation to a permaculture ecology, a steady state economy, and the empowerment of secular humanist global civil society. The definitive policy objectives include: clean energy, demilitarization, universal basic income, universal health care/ drug legalization, universal education, human rights, and so on... TATO’s abstract objective is thus to normalize functional socialism, not to mention put war out of

business. As a result of the conducted research the conclusion was formed: metamodernism is the peaceful release of tension compelled by a broad consensus on truth, and to overturn the status-quo that is blocking that truth. While the inconclusive character of postmodernism was figuratively a 'work-in-progress', metamodernism is explicitly working on progress, pledged to the reconstruction of society.

**The U.S.'s withdrawal from INF treaty: Is the repetition of the Cuban missile crisis real?/ Выход США из ДРСМД: возможно ли повторение Карибского кризиса?**

The intermediate-range Nuclear Forces Treaty signed in 1987 became the basis for modern nuclear non-proliferation regime. Being the main participants of nuclear control, Russia and the U.S. have long had mutual claims on the grounds of breaching the contract. Today political scientists warn that the U.S. decision to exit the Treaty is the next step in the global arms race. Is that the case? Who is to blame for the situation? Is this problem as dangerous as we think, and how to prevent the world from a new collision? This report attempts to answer these questions.

**Henry Kissinger: the theory and practice of realpolitik/ Генри Киссинджер: теория и практика реальной политики**

Henry Kissinger took an active part in the main processes of world politics of the 20<sup>th</sup> century that laid the groundwork for the modern world order. The specificity of Kissinger's activities is in his commitment to realpolitik. Kissinger's contribution to the theoretical conceptualization of international relations and the analysis of the balance of

power on the world stage, including the modern one, is great. This confirms the relevance of the research. The novelty and the aim of the work are related to comparing the theoretical positions and practical actions of Kissinger regarding several important international political processes and characterizing them as examples of realpolitik.

**Philosophical and political bases of Trotsky's papers during his years of immigration in the UK and the USA/ Философские и политические основания работ Троцкого во время иммиграции (Великобритания и США)**

The theoretical basis for the Russian revolution was made by several people during centuries yet the hardest thing was to develop a plan and implement these ideas. Trotsky was one of those who had a great influence on this process. This report aims to analyze his philosophical ideas, which were generated and expressed during the period of emigration in Europe and the USA. The purpose of this report is:

- 1) To describe the political situation in the UK and the USA during that period;
- 2) To show how Trotsky's ideas were transformed during his years of immigration;
- 3) To study Trotsky's philosophical ideas about the state and revolution.

**Reasons behind the growth in popularity of Irish culture in the modern world/ Причины роста популярности ирландской культуры в современном мире**

The modern world is experiencing a growing interest in the Irish culture. Heroes of Celtic myths appear more and more often on television screens and in comics, and Irish musical motifs are now heard in many modern musical hits. The Irish national and ethnic identity is experiencing severe changes, which positively affects the process of popularization of Irish culture in the world. Irish culture is in the state of renaissance, it serves as a source of inspiration for products of mass culture. Ireland with its changing national and ethnic

identity has been an object of cultural interest for the public for over twenty years. The purposes of this report are:

- 1) To examine the ideas of national and ethnic identity to point out their value to this study;
- 2) To identify the main reasons and trends of Irish national identity change;
- 3) To study the cultural phenomenon of the “Celtic tiger” and compare it to the factors that helped to stabilize Ireland since the 1990s;
- 4) To reveal the reasons for the growth in the international popularity of Irish culture through the “Celtic tiger” phenomenon;
- 5) To study the formation of Irish cultural “calling cards” and to explain their popularity.

**Theological education in England: its history, state and relevance in the modern world/ Теологическое образование в Англии: история, современное состояние и актуальность**

Theology was once the only subject that one could expect to study in Middle-Age European universities which, however, in the Industrial and Modern Ages lost its importance and gradually died down. Now, though, due to the rise of religious extremism and religiously-motivated violence, theology is reemerging as a relevant and important subject of study. In England, theological education has a rich history, which continues to this day in leading universities and small seminaries alike.

The purpose of this report is to:

- 1) To give a brief introduction into the rich history of theological education in England;
- 2) To analyze the modern state of theological education in England;
- 3) To examine the causes of the resurgence and growing relevance of theology and theological education in England;
- 4) To make a prediction on the future of theological education in England.

**S. Huntington's theory of revolutions; Modernization through revolution/ Теория революций С. Хантингтона – модернизация посредством революции**

The work considers key points of S. Huntington's theory of revolutions. Such as the assertion that the phenomenon of revolutions exists only in transitional societies. Furthermore, the work examines three phases of revolutions, which S. Huntington singles out — weakening the old regime; mobilizing new groups into politics and creating new institutions; violent overthrow of the political institutions of the old regime. Depending on the order of three phases the scientist identifies two models of revolutions — the West and the East. S. Huntington's theory is analyzed in the context of other alternative theories. The work considers advantages and disadvantages of S. Huntington's approach.

**The Hollywood Renaissance and its influence on the contemporary American film industry/ «Голливудский ренессанс» и его влияние на современную американскую киноиндустрию**

What is Hollywood nowadays? Is it an immense commercial project? A factory of dreams? A place of power? In our talk we are going to discuss a movement in the American film industry usually known as “New Hollywood” or “the Hollywood Renaissance”. It was a turning point in American film-making that shaped the contemporary image of Hollywood. Our goal is to investigate how moral borders in movies were broadened and what effect it had on society and its ethics. Via examining trends in mass culture we are going to portray a contemporary human with his vices and virtues, the society based on consumption and the so called modern ethics. This study will help us to answer the intriguing question: should art (if we assume that film-making is art) be restricted by ethics?

**US historical policy and the transformation of society's ideological foundations/ Историческая политика Соединённых Штатов Америки и трансформация идеологических основ общества**

The report is devoted to the research of changes in the ideological foundations of American society in a historical retrospective. Thus, the author identifies three main stages in the development of the American society and its ideology. At the first stage, before the beginning of the twentieth century, the memory about contradictions between confessions, conflicts during the Civil War and social upheavals on the eve of 1914 was strong. The second stage of social development began with the entry of the United States into the First World War. The war united American citizens, smoothed out contradictions and spawned the new “melting-pot” ideology. After the Second World War, the third type of ideology appeared together with the process of democratization of society – the ideology of “salad bowl”. All these processes are reflected not only in the scientific literature, but also in the cinema, in school textbooks and in the literature.

**Music in political discourse; A case study of Canada’s national anthem/ Музыка в политическом дискурсе на примере национального гимна Канады**

Like all semiotic systems, sound and music have their own specific characteristics, which can be used in special ways. Scholars have argued that music has a special kind of power as a carrier of collective memory and tradition, functioning more in emotional and even physical sense. This report introduces the Multimodal Critical Discourse Analysis (MCDA) and describes some features of this approach. It then proceeds to apply these ideas to Canada's national anthem by analyzing the lyrics and considering how the key ideas are conveyed through the sound.

**How politics can impact a language; A case study of Scottish Gaelic/ Влияние политики на язык на примере шотландского языка**

One of the most important questions of multinational states is the issue of national languages. Very often the culture of the so-called titular nation dominates in the given state and prevails over the culture of small nations. This leads to an actual scarcity of

culture and the extinction of the language of national minorities. Politics as the sphere of interaction among people certainly affects the language processes. The people in a weaker political position, consequently, lose their cultural and linguistic influence trying to survive in the conditions of the domination of another nation. This research is aimed at considering ways of political influence on language and the consequences that such a policy leads to. Scottish Gaelic or the Scots Gaelic language is taken as an example, the history of which is a good historical case in the light of the issues of the position of national languages and the influence of the political sphere on their existence.

**India's ecological situation and the country's strategy to improve it/ Экологический вопрос Индии и стратегия его решения**

Over the past twenty years such matters as environmental crisis, global warming and climate change have been placed on the agenda in almost all countries. In the modern world solution to the environmental problems is one of the key issues in the policy of not only developed but also developing countries.

According to recent data India accounts for the largest share of carbon emissions among developing countries (about one third of global carbon emissions), and many experts predict that by 2050 this figure will increase to 45%. Hence, at the present stage, the country is facing particularly many challenges related to ecology and climate change. This paper presents an analysis of India's strategy to improve the current environmental situation.

**The issue of mutual influence of art and consumer society in the USA/ Проблема взаимного влияния искусства и общества потребления в Америке**

The report presents a two-sided view of the relationship between contemporary art and consumer society in the modern world. This report tries to understand complicated relationship between art, artists and consumerism, by showing various examples of art works that represent the artists' views on the issue of constantly increasing consumption and people being absolutely obsessed with consumption of goods. Also, the report is mainly focused on the USA, as the main driver of consumerist movement. In conclusion, this report proves that art market plays an important role in shaping consumer society and consumer choices of art dealers, museums and collectors. Moreover, it is stated, that art market is also a part of consumer society, as it is defined by the same main principles as the phenomenon of consumerism.

**American transnational corporations as the 'fifth power'/ Транснациональные корпорации США как «пятая власть»**

Since the late 1990s American transnational corporations have played an increasingly important role in international economy. The result has been a growing influence on world politics, which can be viewed as a new phenomenon that has led some scholars to speak about the 'fifth power' in the system of government. The most important part of this phenomenon is the emergence of qualitatively new actors in the global political field - the so-called 'non-state actors of world politics' who operate as economies in their own right. Analyzing their own special corporate methods, the report tries to estimate the impact of their influence on global politics.

**A comparative analysis of Marine Le Pen's image in the United States, France and Russia/ Сравнительный анализ образа Марин Ле Пен в США, Франции и России**

The report is devoted to the comparative analysis of the image of the French politician Marine Le Pen, formed by the media of three states - France, Russia and the United States. For the analysis, the profiling method is used and translations of the same speech in different information sources are considered. It is interesting that the speech of the politician in the original may be characterized as energetic, and in translation, it is already called shocking or even aggressive. And the speech itself is also often translated in such a way that its meaning changes completely. In the course of the study it was revealed that the images of Marine Le Pen in the United States and in Russia correspond to her opinion and feedback about these countries. For example, if Marine Le Pen criticizes the policy of the United States, then the American media criticize this politician and translate her speech, changing the meaning of the phrases in many ways. And in France, the created image depends on which media they use - pro-government or opposition.
